Summary

Motivated Computer Science student with hands-on experience in technical support and software development. Proven ability to troubleshoot hardware and software issues while delivering exceptional customer service. Adept at developing secure applications and streamlining technical processes in agile environments. Brings strong proficiency in multiple programming languages, IT infrastructure, and automation scripting.

Skills

- Coding Languages: Python, Java, JavaScript, C++, C, C#, Flutter / Dart, HTML, CSS, SQL
- Technologies: Microsoft Office, Google Suite, VSCode, PyCharm, GitHub, Git
- Skills: Object-Oriented Programming, Database Management, App development, Web development, Debugging, Troubleshooting, Customer Service, Technical Support, Hardware and Software implementation, IT Infrastructure, Automation Scripting
- Spoken Languages: English, Gujarati, Hindi

Experience

Select Management Resources

IT Technician and Technical Support | Alpharetta, Georgia | 1/23 - 7/23

- Delivered efficient technical support through phone, email, and chat, for over **75** daily inquiries, resolving issues promptly and effectively achieving **80%** first-call resolution rate.
- Developed comprehensive documentation with descriptions and images and proceedings, for ticketing systems, issue handling protocols, and proper troubleshooting methods, streamlining workflows and reducing resolution times for newer employees by **20%**.
- Diagnosed and addressed system and hardware errors through comprehensive troubleshooting, resulting in a **25%** reduction in recurring and near **100%** resolution of critical system and network errors.
- Leveraged Microsoft Office Suite to create reports, present data, and facilitate effective team collaboration.

Projects

Password Manager (Python: CustomTkinter, Sqlite3, Cryptography.Fernet)

- Overview: Developed a secure password manager featuring an intuitive graphical user interface that enables users to safely store, manage, and retrieve login credentials.
- User Authentication: Implemented a robust login and sign-up system with encrypted password storage, ensuring secure user data handling.
- Encryption: Utilized the Cryptography.Fernet module to encrypt and decrypt passwords, maintaining data integrity within the SQLite database.
- Data Management: Enabled users to efficiently add, edit, delete, and view account information via a user-friendly interface.
- Error Handling: Integrated comprehensive error handling to manage user input and file operations, improving application stability.

Calculator (Python: Tkinter)

- Overview: Developed a simple yet effective calculator application with a user-friendly GUI for performing arithmetic operations.
- Interactive Input Handling: Designed and implemented functions to accurately manage button presses and operation inputs, ensuring real-time updates on the display.
- Real-time Visual Feedback: Created a dynamic feedback system that visually represents ongoing calculations as the user inputs data.

Education

Bachelor of Science in Computer Science Georgia State University | Graduating April 2027

- Relevant Coursework: Data Structures and Algorithms (Python), Principles of Computer Programming I (JavaScript) and II (Python), Theoretical Foundations of Computer Science (Discrete Math), System Level Programming (C, C#, C++, Shell Scripting, Unix), Computer Organization Programming (C++, Assembly Language), Principles of Physics I and II (Calculus Based), Calculus I and II, Linear Algebra, Probability and Statistics
